

MUSCLEMAGIC

FAST-ACTING JOINT, MUSCLE & ARTHRITIS PAIN RELIEF

Proven effective in all
3 stages of
physical activity:

Pre-Exercise

Warms up muscles,
prevents cramps

During

Deep-heat increases
mobility and optimizes
performance

Post-Exercise

Provides fast relief
to sore muscles and
speeds up recovery

MAXIMUM STRENGTH

PROVEN ALL-NATURAL PAIN RELIEF CREAM

- Deep penetrating heat
- Fast acting anti-inflammatory action
- Enriched with Emu oil
- Fresh Scent

MUSCLEMAGIC® Pain Relief Cream is the preferred choice of pro-athletes, athletic trainers, and active individuals for soothing relief from pain in muscles and joints. The premium topical analgesic reaches the pain source quickly to alleviate soreness, stiffness, overextension and discomfort resulting from strenuous physical activity, but it has long been recommended by hands-on healthcare professionals due to its ability to do much more.

This deep-heat rub is masterfully designed for pre, during, and/or post-exercise use to help warm up muscles, maximize performance, and speed up recovery time, respectively. Fitness enthusiasts have confirmed that using this solution before and after workouts yields less cramping, fatigue, and soreness.

MuscleMagic is manufactured by Derjers International, proud to be a minority-owned company based in Michigan. Originally formulated to treat arthritis and carpal tunnel, MuscleMagic treats pain at the source unlike any other product on the market which imparts a solid advantage for individuals that incorporate it into their routine.

It's simple: MuscleMagic works.

Proven to relieve pain and aches associated with:

MUSCLEMAGIC

FAST-ACTING JOINT, MUSCLE & ARTHRITIS PAIN RELIEF

Proven effective in all
3 stages of
physical activity:

Pre-Exercise

Warms up muscles,
prevents cramps

During

Deep-heat increases
mobility and optimizes
performance

Post-Exercise

Provides fast relief
to sore muscles and
speeds up recovery

Active individuals trust MuscleMagic® for its three-fold approach during all stages of physical activity:

- **BEFORE:** Deeply penetrates to relax and loosen muscles for maximum utilization, preventing muscle cramps.
- **DURING:** Sustains heat, enabling tendons, muscles, and joints to stay loose. Reduces inflammation and controls muscle spasms.
- **AFTER:** Rebuilds damaged cartilages and connective tissues. Targets pain source to soothe, lubricate aching, injured muscles for all-day comfort.

KEY INGREDIENTS & BENEFITS

Emu Oil: Athletic trainers recognize the benefits of emu oil and use it for pulled muscles as it contains high levels of linolenic acid - a substance known to ease joint pain - and oleic acid which has local anti-inflammatory effect on dermal tissue, inducing long-lasting pain relief. This instantly-absorbed moisturizing oil acts as a trans-dermal carrier to improve the delivery of added therapeutic ingredients.

Camphor: Increases blood flow, delivering more healing substances to the painful area. Numbs the peripheral sensory nerves and produces a cooling effect, followed by a feeling of warmth to suppress the perception of pain.

Methyl Salicylate (Wintergreen Oil): A rubefacient that causes dilation of the capillaries and increases blood circulation; blocks chemicals in the body that cause pain. Contains analgesic and antiseptic properties.

Oleoresin Capsicum: Eases inflammation and blocks the production of substance P, a neurotransmitter that conveys pain signals from the site of an injury to the brain. Produces slight warm sensation that wears off within 15 minutes.

Turpentine Oil: Antiseptic herbal extract known for its "clean scent" as well as its cooling properties to relieve joint, muscle, and nerve pain.

IDEAL ALTERNATIVE TO TRADITIONAL NSAIDs

As a greaseless external pain management solution, side effects associated with internal analgesics are not experienced with MuscleMagic – thus providing an all-natural alternative to pain meds, yet works effectively without interfering with other therapies.

4 oz.

Train harder & recover faster with less joint & muscle pain.
